vitamin ('vɪt-, 'vaɪtəmɪn). orig. **vitamine** ('vaɪtəmɪn, 'vɪt-, -iːn). [f. L. *vīt-a* life + AMINE, from a mistaken belief about the chemical nature of the compounds (cf. quot. 1920).]

1. a. Any of a diverse group of organic compounds of which small quantities are needed in the diet because they have a distinct biochemical role, often as coenzymes, and cannot be adequately synthesized by the body, so that in most cases a deficiency produces characteristic symptoms or disease.

1912 C. FUNK in *Jrnl. State Med.* XX. 342 It is now known that all these diseases, with the exception of pellagra, can be prevented and cured by the addition of certain preventive substances; the deficient substances, which are of the nature of organic bases, we will call 'vitamines'; and we will speak of a beri-beri or scurvy vitamine, which means a substance preventing the special disease. 1915 *Times Lit. Suppl.* 11 Nov. 400/3 The point about vitamines is that without them the animal ceases to grow or becomes diseased on a physiologically pure diet. 1916 MCCOLLUM & KENNEDY in *Jrnl. Biol. Chem.* XXIV. 493 We would .. suggest the desirability of discontinuing the use of the term vitamine, and the substitution of the term fat-soluble A and water-soluble B for the two classes of unknown substances concerned in inducing growth. 1920 J. C. DRUMMOND in *Biochem. Jrnl.* XIV. 660 The criticism usually raised against Funk's word Vitamine is that the termination '-ine' is one strictly employed in chemical nomenclature to denote substances of a basic character, whereas there is no evidence which supports his original idea that these indispensable dietary constituents are amines... The suggestion is now advanced that the final '-e' be dropped, so that the resulting word Vitamin is acceptable under the standard scheme of nomenclature .. which permits a neutral substance of undefined composition to bear a name ending in '-in'. If this suggestion is adopted, it is recommended that the somewhat cumbrous nomenclature introduced by McCollum (Fat-soluble A, Water-soluble B), be dropped, and that the substances be spoken of as Vitamin A, B, C, etc. 1932 METCALF & FLINT *Princ. Insect Life* xii. 465 Green plants can .. manufacture complicated proteins, carbohydrates, fats, and vitamines from the nitrates, phosphates, sulfates, and water of the soil. 1966 V. B. WIGGLESWORTH *Life of Insects* iv. 75 Cockroaches whose symbionts have been killed out by treatment with antibiotics must have extra vitamins in their diet. 1974 *Daily Tel.* 15 Feb. 17/4 Vitamins have received so much publicity as an essential factor for healthy living that there has been a tendency to forget that in excess some of them at least can be harmful. 1982 F. UNGAR in T. M. Devlin *Textbk. Biochem.* xv. 719 Since the rat has this enzyme and ascorbic acid can be synthesized in its tissues, ascorbic acid is not a vitamin for this species.

During the first half of the 19th century, however, this traditional Italian manner of singing in the top range fell into disuse, and the expression *voce di testa* came to refer to the normal, much stronger head voice, falsetto being reserved as a special effect only for the very highest notes.

Hence **vorti'cosely** *adv.*, in the manner of a vortex; vortically.

1882 *Nature* XXV. 291 There is a strong inflow of the air along the surface of the ground all round vorticosely towards the base of the whirlwind. **1883** *Encycl. Brit.* XVI. 131/2 The strong air currents which .. converge vorticosely round the base of the column [of the dust storm].

W

W ('dʌb(ə)lju:), the 23rd letter of the modern English alphabet, is an addition to the ancient Roman alphabet, having originated from a ligatured doubling of the Roman letter represented by the U and V of modern alphabets. When, in the 7th c., the Latin alphabet was first applied to the writing of English, it became necessary to provide a symbol for the sound (w), which did not exist in contemporary Latin. This sound, a gutturally-modified bilabial voiced spirant, is acoustically almost identical with the devocalized (u) or (ʊ), which was the sound originally expressed by the Roman U or V as a consonant-symbol; but before the 7th c. this Latin sound had developed into (v). The single *u* or *v* therefore could not without ambiguity be used to represent (w), though this was occasionally done, and in some Northumbrian texts was the regular practice. The ordinary sign for (w) was at first *uu*, but in the 8th c. this began to be superseded by ƿ, a character borrowed from the Runic alphabet, in which its name was *wyn* (Kentish *wen*). Eventually the use of ƿ became almost universal, but in the mean time the *uu* was carried from England to the continent, being used for the sound (w) in the German dialects, and in French proper names and other words of Teut. and Celtic origin. In the 11th c. the ligatured form was introduced into England by Norman scribes, and gradually took the place of ƿ, which finally went out of use about A.D. 1300. The character W was probably very early regarded as a single letter, although it has never lost its original name of 'double U'.

In OE. the sound (w) occurred initially not only before vowels but also before (l) and (r). The combination *wl* became obsolete in the 15th c. (in Sc. poetry *wlonk*, alliterating with *w*-words, was used in the 16th c.); *wr* is still written, but the *w* is silent in standard English, though in some dialects it is sounded as (w) or as (v). OE. had also the initial combination (hw), written *hu*(*u*, *hƿ*, and subsequently *ph*, *wh*; for the later development of this phonetic combination, and the history of the associated symbols, see WH.

The chief etymological sources of the Eng. (w) are: (1) OE. (w), mainly representing Indogermanic *w*, *gh*^{w}, *kw*, or *k*^{w}; (2) ON. (w) of the same origin (in cited words expressed by *v*, according to Icelandic usage); (3) OF. (w), retained in north-eastern Fr. dialects, but elsewhere becoming (gw) and ultimately (g), whence in English such doublets as *wage* and *gage*, *warranty* and *guaranty*. The sound also occurs, represented otherwise than by *w*, in words of Latin origin containing the combinations *qu* (kw) and *su* (sw), as *question*, *suavity*, *persuade* (in 16–18th c. often written with *sw*); also in a few Fr. words, as *reservoir* (-vwɑ:(r)).

So far as it remains a consonant-symbol, the letter never denotes any other sound than (w), but in a few words it has ceased to be pronounced, though still written, as in *answer*, *sword*, *two*, and in the combination *wr* referred to above. In the unstressed second element of a compound, (w) tends to be elided in colloquial speech. This contracted pronunciation is in some words a mere vulgarism (marked as such by spellings like *back'ard*, *forrard*, *allus* for *always*); in *Norwich* and some other place-names in *-wich* it is the only one regarded as correct, and the same may be said with regard to the nautical term *gunwale*; in *midwife* the contraction ('mɪdɪf), formerly general, is now rarely heard. The tendency to elision of *w* beginning an unstressed second syllable is shown also in the change of *housewife* into *huzzif*, *huzzy*, where the spelling has followed the pronunciation, though the uncontracted form is now restored exc. in a special disparaging sense.

In some ME. MSS. (northern and north midland), and in many Scottish texts of the 15th and 16th centuries, *w* is written for *v*, and vice versa. In the 16th and 17th c., books printed from continental type often have the letter in the divided form VV, vv.

In ME. a new (w) arose from the development of intervocalic or final (ɣ), inherited from OE., as in *bowe*:—earlier *boɜe*:—OE. *boɣa*. This sound, however, has not survived as a consonant, because every (w) after a stressed vowel became a *u*-glide, the terminal element of a diphthong. From the early ME. period *w* was often substituted for *u* in vowel-digraphs (whether denoting diphthongs or simple vowels). In modern spelling *aw*, *ew*, *ow* are phonetically equivalent to *au*, *eu*, *ou*, though *ow* never stands for (u:), as in the older *yow* = *you* (except in the surname Cowper); the choice between *u* and *w* has been determined to some extent by etymological tradition, but is mainly arbitrary; at the end of a word *w*, not *u*, is used all but invariably. The traditional statement of grammarians that 'W is a vowel as well as a consonant' refers to its use in these digraphs; but in the 14–15th c., and in Sc. also in the 16th c., *w* occasionally represents (u:), as in *trw* = true, *swne* = soon, *swth* = sooth.

In south-eastern dialects (w) is regularly substituted for (v), and many writers of the first half of the 19th c. attribute to the Cockney dialect the habit of misusing (v) for (w) and (w) for (v) on all occasions. No trace of this survives in present-day London speech; and although there is no doubt that the Kentish (w) for (v) at one time extended to London, it is probable that the reverse substitution was merely an occasional (if perhaps rather frequent) result of the endeavour to speak correctly.

1763 FOOTE *Mayor of G.* I. (1764) 21 *Sneak.* Yes, werry like Wenus. **1803** PEGGE *Anecd. Engl. Lang.* (1814) 77 The ..most offensive error in pronunciation among the Londoners..lies in the transpositional use of the letters *W* and *V*, ever to be heard where there is any possibility of inverting them. Thus they always say, *W*eal, instead of *veal*; and *W*inegar, instead of *vinegar*; while, on the other hand, you hear *V*icked, for *wicked*—*V*ig, for *wig*; and a few others. **1805** T. HARRAL *Scenes of Life* III. 26 'Last night thou gavest me to a willain's arms!'—'A villain?'..'Ay, a willain!' **1837** DICKENS *Pickw.* xxxiv, 'Do you spell it [Weller] with a V or a W?'..'I spells it with a V'... 'Quite right too, Samivel... Put it down a we, my lord'. **1844** T. H. KEY *Alphabet* 107 London too is remarkable for the confusion of the sounds, though this confusion does not seem to arise from any inability to pronounce either a *w* or a *v*, each being substituted for the other with a most amusing perversity.

A mispronunciation of (w) for (r), in some persons due to a physical defect, has sometimes been a fashionable affectation.

1837 DICKENS *Pickw.* xxxv, 'Gwacious heavens!' said his lordship. 'I thought evewebody had seen the new mail-cart; it's the neatest, pwettiest, gwacefullest thing that ever wan.' **1844** T. H. KEY *Alphabet* 93 The letter *r* is at times confounded with *w*. Thus it is not a very rare variety of articulation that *rubbish* is pronounced *wubbish*.
